

When you purchase this font on itch.io you are licensed to:

Use it in any creative project however you want as a part of said project with the exception of any Generative AI applications (see below).

There's no need to give me attribution.

However, it is always welcome and helps me out a ton!

However, you are not allowed to distribute it AS A FONT. Don't give it to people who don't have a license.

Don't sell it as a font. Don't give it to a Wizard as some part of dark bargain.

So, you can do something like using it in the title screen and menus of your game. Hell yeah, no problem!

But, you can't upload or distribute the otf or ttf fonts on your own itch page or something similar.

Generative AI Clause:

You are not allowed, no matter how much you pay/donate for this font, to use the assets in any form of blockchain-related/crypto-related platform, medium or technology, which includes NFTs, P2E games, cryptocurrency, metaverse or future inventions in the space. You can not use them in any relation to NFTs, sell them by themselves, create games associated with blockchain/crypto technologies.

Even when the assets are modified, you are not allowed to use my assets in any kind of blockchain/crypto related technology, platform.

You are not allowed to use the assets to promote your blockchain/crypto related projects on any social media platforms, on blockchain/crypto related websites, white pages and similar platforms and marketplaces.

You can't use the assets to train any LLM, Generative AI or similar technology or future inventions in the space. Please support real, human art.

It means the world to me you bought this and supported me - I would love to see what you made with it!
